BRO-RET-402-PM

Due to printing process, actual colors may not be exactly as shown.  
 Please check the Novabrik samples.

We endeavor to manufacture our products in  
 even colors, shades, and textures, but variances  
 may still occur in daily manufacture.

To obtain an even distribution of color and  
 texture, it is recommended that product from a  
 number of pallets be blended together during the  
 installation process.

\*50 Years Limited Warranty.

BUILDING CODE APPROVALS : CCMC 12833-R  
 ICC -ES ESR-1235

A mix of colors can be used to create a design.

Post-Frame building, with Wainscot Cap

**Installing Novabrik is quick and easy!**

**Complete the prep work...**

**Install the corner blocks...**

**Fasten the bricks.**

## The Brick Without Mortar

Novabrik is an innovative Mortarless Brick Siding. It provides exceptional versatility, and design flexibility. This unique veneer system was created after more than 5 years of research and development. Novabrik is manufactured by regional producers, under license in the USA, Canada and throughout the world.

## Protect Your Investment

Novabrik increases the wall rigidity of conventional wood-frame houses by an average of 35%. It can easily withstand the effects of strong earthquakes. Its rain-screen design prevents water from penetrating the wall from the outside and the mortarless construction promotes air flow in the wall cavity, thus removing any moisture coming from the inside. The water-absorption of the high strength concrete composition is less than 5%, ensuring exceptional resistance to freeze-thaw cycles.

Residential remodeling

Commercial building with corporate colours

New residential construction

**Novabrik requires no brick ledge and can be easily installed on various types of structures and in all weather conditions.**

## Characteristics

- NO MORTAR
- EASY to install
- DURABLE
- UNPARALLELED Beauty
- RESISTS Water Penetration
- NO Maintenance
- HIGH Wind Resistance
- EXCEEDS all Building Code Requirements

For the base course, **drill and screw** at the location of every furring strip. **Repeat** this step at every fourth course thereon after. Refer to the installation guide before proceeding.
